

# Index

## A

American Academy of Pediatrics (AAP), 13

Anorexia nervosa

complications, 28  
diagnosis and assessment, 26  
incidence and prevalence, 27–28

management, 27

outcome, 27

psychiatric comorbid, 28

serum 25(OH)D, 28, 29

vitamin D supplementation, 29

Auspitz sign, 89

## B

Bariatric surgery

biliopancreatic diversion, 33, 34

bisphosphonate therapy, 38

diagnosis/assessment, 34

hyperparathyroidism, 37

hypocalcemia, 38

management, 35

outcome, 36

PTH, 37

Bone mineral density (BMD), 79

## C

Calcium

intestinal absorption, 4

supplements, osteopenia, 19

Chronic kidney disease (CKD)

BMD, 79

calcimimetics, 82

calcitriol, 81

calcium and iPTH, 79

cinacalcet, 79

clinical pearls/pitfalls, 82–83

diagnosis/assessment, 78

eGFR, 78

hypercalcemia and iPTH, 77

hyperparathyroidism, 80, 81

KDOQI guidelines, 81

management, 79

measurements, 81

nodular hyperplasia, 81

1,25(OH)<sub>2</sub>D, 80

parathyroid glands, 82

parathyroidectomy, 81

paricalcitol, 80, 82

phosphorus excretion, 81

Cystic fibrosis (CF)

diagnosis and assessment

osteopenia, 19

pancreatic exocrine

insufficiency, 18

Cystic fibrosis (CF) (*cont.*)

- lung pathology, 20
- management, 19
- outcome, 19
- pancreatic exocrine insufficiency, 20
- recurrent pulmonary infections, 20
- serum 25-hydroxyvitamin D (25(OH)D), 21
- tanning beds/UV lamp therapy, 21

**D**

- Dual X-ray absorptiometry (DEXA), 35

**E**

- Endocrine society, 12, 13, 27
- Estimated glomerular filtration rate (eGFR), 78

**F**

- Fibroblast growth factor (FGF), 63

**H**

- Human cathelicidin (hCAP), 21
- Hypocalcemia, 10, 11
  - acute treatment, 52
  - diagnosis/assessment, 50, 51
  - outcome, 53
  - post-surgical management, 51
  - thyroidectomy, 54
- Hypoparathyroidism, 51–53
  - acute, 51, 55
  - calcitriol, 55
  - case studies, 49–50
  - outcome, 53
  - permanent hypoparathyroidism, 51, 55
  - PTH 1–84, 52, 53

**I**

- Infants, vitamin D deficiency diagnosis/assessment, 10
- generalized seizures, 9
- lactating women, 12
- management/outcome, 11
- maternal vitamin D status, 11
- perihilar infiltration, 10
- supplementation in pregnancy, 12
- Institute of Medicine (IOM), 12
- Intact parathyroid hormone (iPTH), 77

**K**

- Koebner phenomenon, 89

**L**

- Leukocytosis, 10
- Lyme disease, 2

**M**

- Malnutrition, 26
- Maternal vitamin D deficiency, 11

**N**

- National Health and Nutrition Examination Survey (NHANES III), 20
- National Kidney Foundation Kidney Disease Outcomes Quality Initiative (NKF KDOQI), 79
- Nodular hyperplasia, 81

**O**

- Osteomalacia, 4
- Osteopenia, 19

**P**

Pancreatic exocrine insufficiency,  
18, 20

Periodic acid-Schiff diastase  
(PAS-D), 89

Phosphorus disorder

autosomal recessive rickets, 64

case studies, 59

diagnosis/assessment, 60, 61

FGF-23, 63

hypercalcemia, 65

hypophosphatemic rickets  
syndromes, 64

management, 62

treatment outcomes, 62

XLH, 61, 64

Postsurgical hypoparathyroidism

case studies, 41, 42

diagnosis, 42, 44

hypocalcemia, 44

management, 42, 43, 45

parathyroid hormone, 43

PTH levels, 45

risk factors, 44

symptoms, 44, 46

treatment, 46

Pseudovitamin D deficiency

rickets. *See* Vitamin

D-dependent rickets

type I (VDDR I)

Psoriasis

acitretin, 88

Auspitz sign, 89

BSA, 89

calcipotriene, 92

clinical pearls/pitfalls, 95

erythema and scaling, 93

genetic and nongenetic risk  
factors, 93

keratinocytes, 89, 93

keratins, 93

Koebner phenomenon, 89

management

acitretin, 90

calcipotriene, 92

calcipotriol, 91

combination therapy, 92

corticosteroids, 90

dyslipidemia, 91

emollients and  
moisturizers, 92

gemfibrozil, 91

hypercholesterolemia, 91

hyperlipidemia, 91

hypertriglyceridemia, 91

moderate/limited, 90

topical/systemic therapies,  
90

vitamin D analogs, 91

nail pitting, 88

parakeratosis, 87

PAS-D, 89

plaques, 87, 88

treatment, vitamin D, 94–95

triglyceride levels, 88

types, 93

Psoriasis Disability Index, 90

**R**

Respiratory syncytial virus

(RSV), 10

Rickets, 74. *See also* Vitamin

D-dependent rickets

type I (VDDR I)

**S**

Selective serotonin reuptake

inhibitors (SSRIs), 26

Symptomatic hypocalcemia, 11

**V**

VDDR II. *See* Vitamin

D-dependent rickets

type II (VDDR II)

Vitamin D deficiency case study

diagnosis and assessment, 2–3

management, 3

osteomalacia, 4

outcome, 3

Vitamin D deficiency case study  
    (*cont*)  
    screening, 5  
    serum 25(OH)D concentration  
        measurement, 5  
    skeletal and extraskeletal  
        health, 4  
    sunlight exposure, 4  
    symptoms, 6  
    vitamin D supplements, 6  
Vitamin D-dependent rickets  
    type I (VDDR I)  
    case studies, 71, 72  
    diagnosis, 72  
    management, 73

    treatment outcome, 73  
    VDDR II, 72  
Vitamin D-dependent rickets  
    type II (VDDR II), 72

**X**

X-linked hypophosphatemic  
    rickets (XLH)  
    abnormalities, 61  
    bone disease, 65  
    counselling, 66  
    diagnosis, 60, 61, 65  
    genetic testing, 66  
    treatment, 62
